DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-30, drawn to a process for manufacturing a nucleic acid fragment comprising enzymatically incorporating at the 3' OH end of the nucleic acid fragment a modified morpholino-nucleotide having as precursor a compound of formula (I), classified in class 536, subclass 25.32.
 - II. Claims 31-38, drawn to a process for manufacturing a morpholino-nucleotide of formula (I), classified in class 536, subclass 26.71.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are drawn to the production of two distinct compounds (oligonucleotide vs. nucleotide). The two methods employ different starting materials and methodological steps. The methods are not disclosed as being useful together.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 1623

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
